<b>Universal Rundle (Crane)</b>	Amega Atlas	P03FP55	Clear Crane/UR Replacement

If your toilet model is not included in the table above, you should call the toilet manufacturer directly in order to determine the replacement flapper that you need. Here are several major toilet manufacturers:

- American Standard  
1-800-442-1902

- Briggs  
1-800-627-4443

- Eljer  
1-800-423-5537

- Kohler  
1-800-456-4537

- Sterling  
1-800-783-7546

- Mansfield  
(419) 938-5211

- Toto  
(770) 282-8686

#### **Flapper Hint**

Flappers should be changed at least once a year (along with your smoke alarm batteries). It is important to get the right flapper for your specific model of toilet. If you settle for a one-size-fits-all flapper, you're likely to use more water with each flush.

1. Shut off water supply to toilet.
2. Remove old flapper. Attach new flapper to the mounting arms.
3. Fasten chain onto lift arm with enclosed hook. There should be minimal slack in the closed position.
4. Turn on water supply.

- Crane/Universal  
Rundle  
1-800-546-5476
